Merit Incentive Payment System (MIPS): 2019 Promoting Interoperability

Objectives	Measures - Report at Group/TIN level	Performance Score up to 90%	Reporting Methodology
Required Measures			
Protecting Patient Information	EHR Security Risk Analysis: Conduct or review a security risk analysis of EPHI data created by EHR, implement updates, correct deficiencies as needed.		Yes Attestation Statement
Electronic Prescribing	Generate and transmit permissible prescriptions electronically that are also queried for formulary compliance.	Up to 10%	Numerator & Denominator
Provider to Patient Exchange	Patients are given access to their patient portal within 4 business days of their office visit to ensure they have timely access to view online, download, and transmit their information. *If the patient declines the portal, please note in designated field of your EHR *Once the patient is setup (or declines), no action is needed on subsequent office visits	Up to 40%	Numerator & Denominator
Health Information Exchange: Support Electronic Referral Loops	Sending Health Information: Clinician sends a summary of care electronically when transitioning or referring any patients to another setting of care or health care provider. Clinician must create the summary of care and electronically exchange the record using their EHR (e-fax does not count).	Up to 20% sending	Numerator & Denominator
	Receiving and Incorporating Health Information: For new or patients transitioned into your care (referral), the clinician conducts clinical information reconciliation for medications, medication allergy, and current problem list.	Up to 20%, accepting	Numerator & Denominator
Registry Reporting	Clinician is in active engagement to submit data to two of the following registries (or submit exclusions): • Clinical Data Registry • Electronic Case Reporting Registry • Immunization Registry • Public Health Registry • *Syndromic Surveillance Reporting (not in MD)*	10%	Yes/No Statement
Available Bonus Points			
Query of PDMP	For at least one Schedule II opioid electronically prescribed, the clinician uses their EHR to query PDMP (Prescription Drug Monitoring Program) for prescription drug history; Maryland uses CRISP.	5% bonus – at least one patient in the numerator will earn 5 points	Numerator & Denominator
Verify Opioid Treatment Agreement	For at least one patient for whom a Schedule II opioid was e-Prescribed, if the total duration is at least 30 days within a 6-month look-back period, the clinician identifies the existence of a signed opioid treatment agreement and incorporates it into the patient's record.	5% bonus – at least one patient in the numerator will earn 5 points	Numerator & Denominator
